Attention: Lynn Kunzler - Reclamation Specialist

Re; Perry Estate, Mine Project
S/039/008, Sanpete County, Utah

Dear Mr. Kunzler,

As per request in your letter of July 19, 1994, maps of the quarry site and surrounding area are enclosed. The 20 acre site is shaded in red. Manti City owns the property adjoining us on the South and they gave permission to use this area to dump rip rap and gravel, which the City of Manti will use.

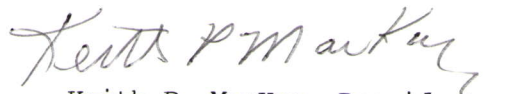

As we discussed, our initial operation will be exploratory to find acceptable rock. We plan to drill into exposed surface rock on the West one quarter of the property. This would also include exposing any rock just East of the access road into the site.

We request a variance for items #12 and #13 for the existing quarry area. There is no top soil available to revegetate the exposed area.

As you know top soil is practically non-existent on the site, especially in the areas of past operations.

We also will remove old rip rap and gravel piles in this five acre area.

Sincerely,

Keith P. MacKay, President

State Stone, Incorporated
Attn: Mr. Keith McKay
4640 South 300 West
Salt Lake City, Utah 84107

Dear Mr. McKay:

This letter is in regard to the quarry operation owned by your Firm and adjacent to Manti City.

This letter is to authorize the dumping and storage of rip rap material on Manti City property, in the wash extending south and somewhat west of our mutual property lines.

Two specific conditions exist for the above noted use of City property, that being (1) the rip rap be stored in the wash with the smaller material to the far south end of the wash and the larger material at the northend of the wash so as to provide ready access to City equipment, and (2) Manti City be provided with an ongoing right-of-way through your property to access the rip rap material.

As a matter of course, Manti City requests confirmation of indemnification for Manti City from your Firm in that Manti City will be protected from and not held liable for any action or accident occurring during work performed by your firm in the course of storing this rip rap on City property.

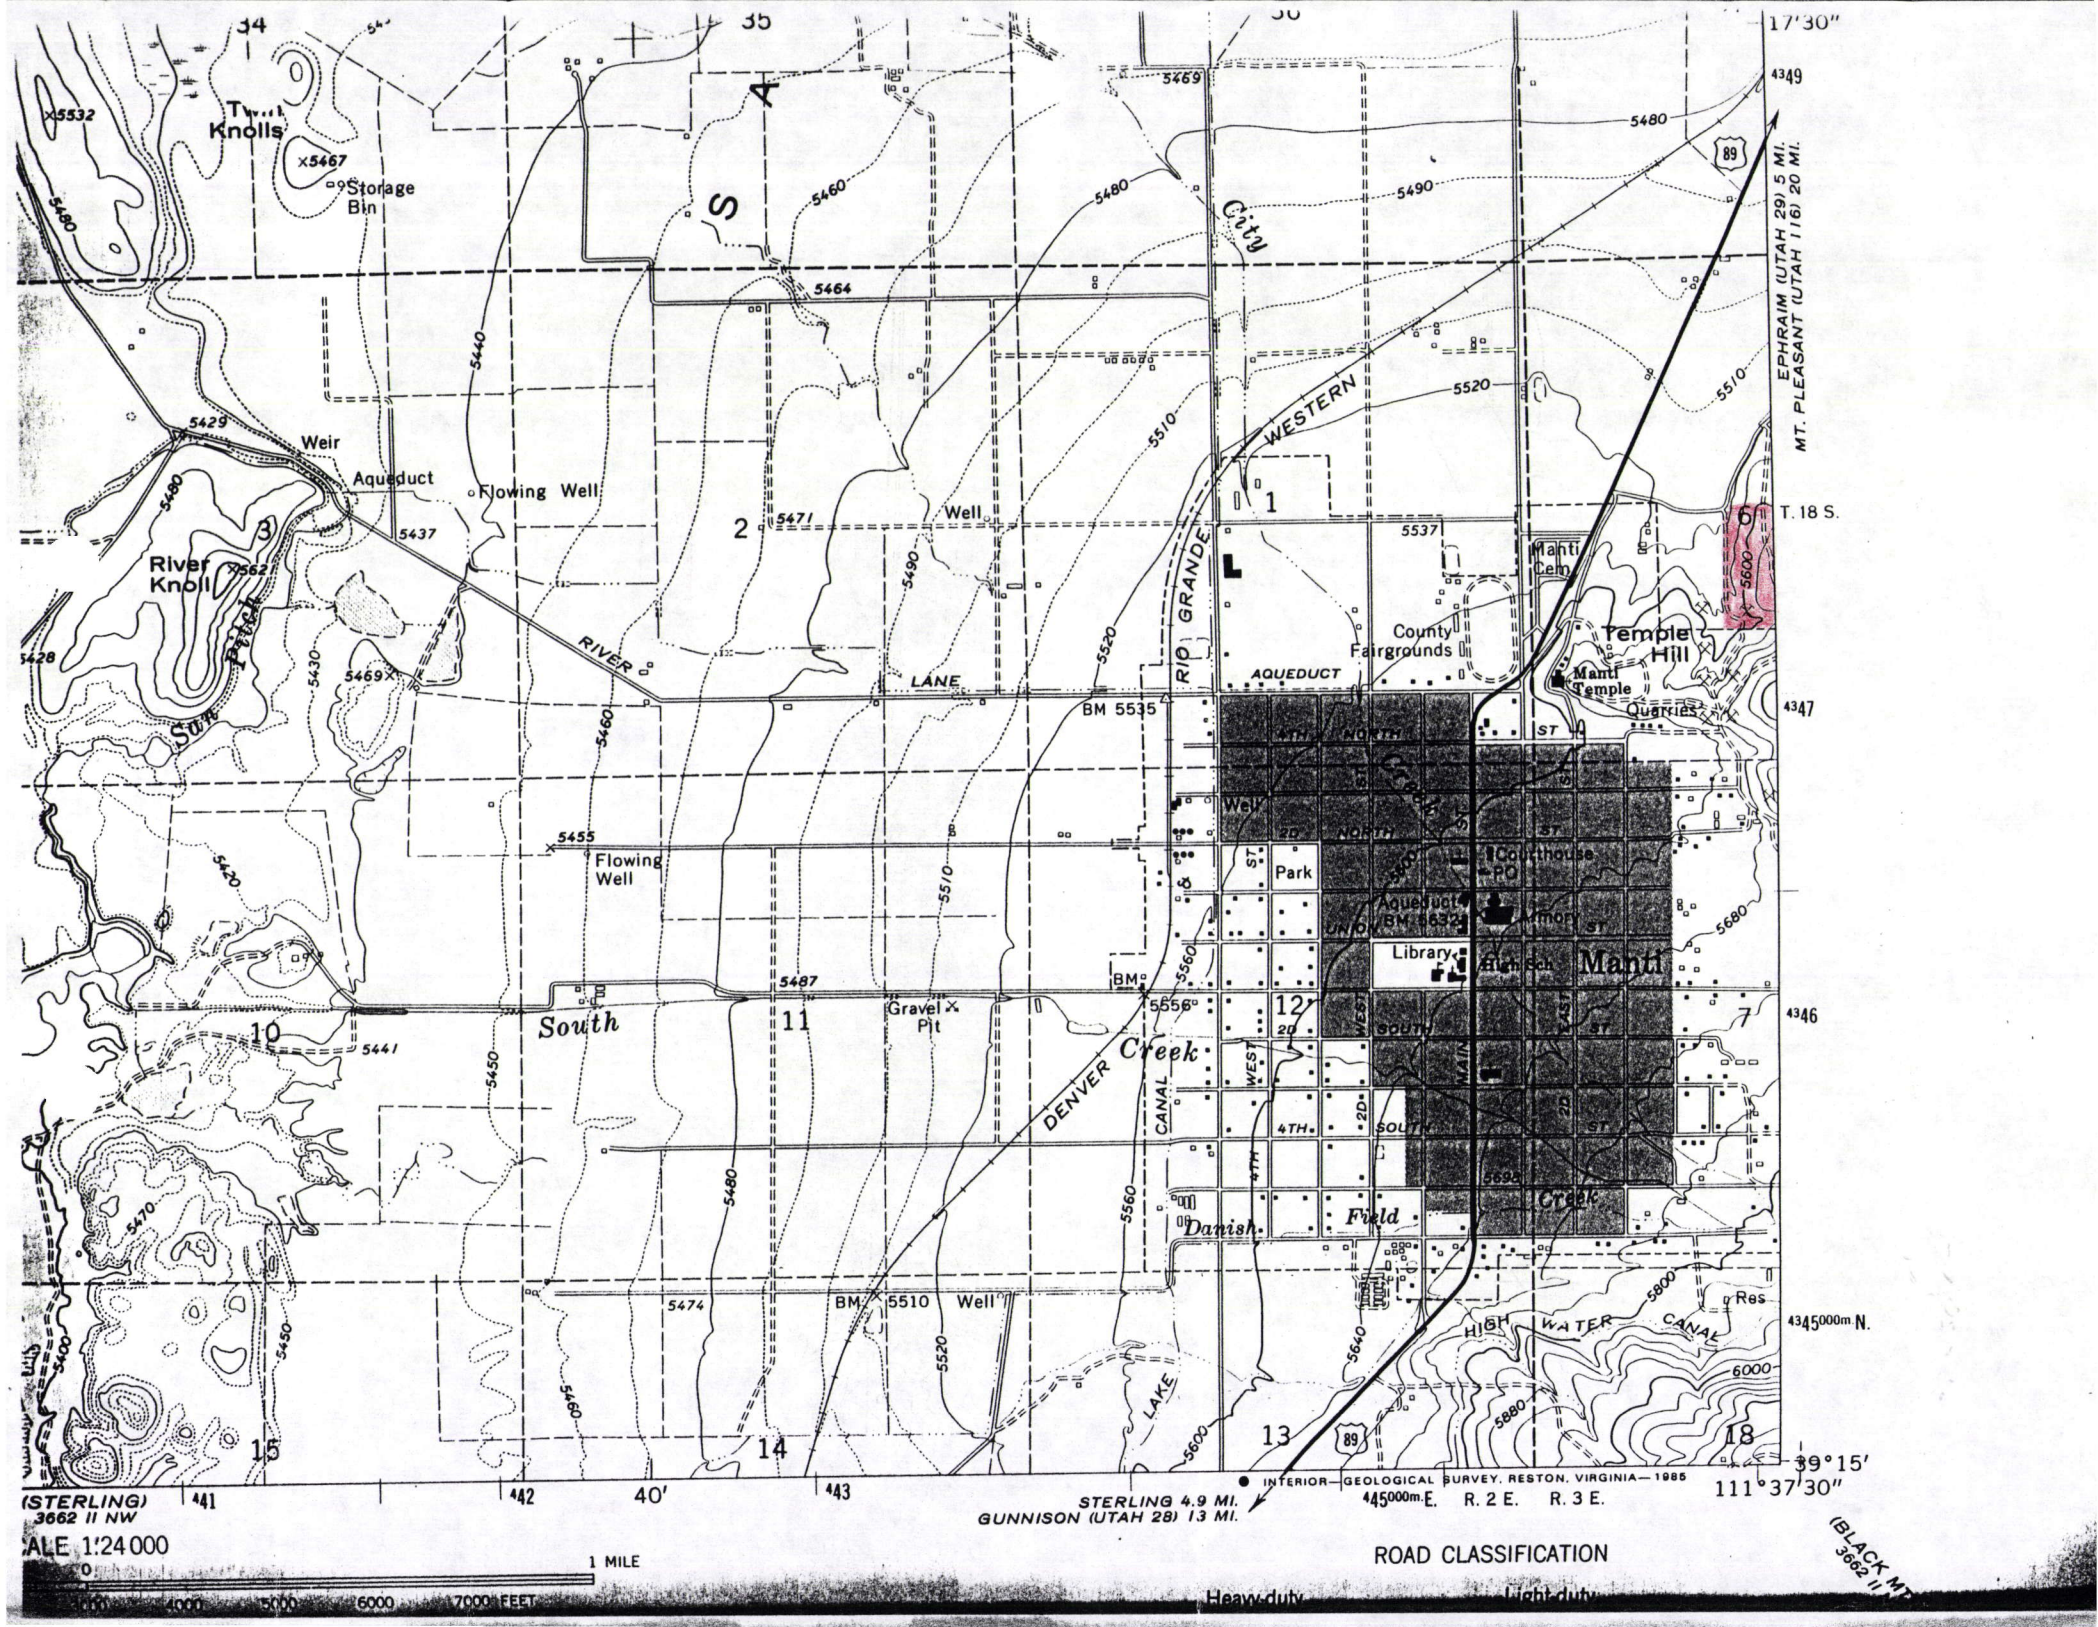

We trust this will be sufficient information for you to begin work and to proceed with storage rip rap on City property. We especially want you to know we look forward to working with your firm in quarry operations and are pleased to have you starting up additional work in the Manti City area.

Sincerely,

William A. Mickelson
Recorder, Manti City
